

Rolling Spider Webs

Materials:

9" x 13" cake pan

black construction paper

white tempera paint

marbles

paper cups

plastic spoons

Helpful Hint:

A sink or bucket and soapy water will be helpful when cleaning after the painting.

Your students will enjoy making their own spider webs with this fun art project. Place black construction paper in cake pan. Drop several small amounts of white tempera paint on the paper with the spoon. Have the children place several marbles in the pan. Tilt the cake pan back and forth, this will allow the marbles to roll around in the pan and create a unique spider web!
