

A FREE Activity Just for You!

My New Friends At School!

Materials needed:

Label sheets

Computer

Clip Art

Start your year out with this fun sticker swap. Before the start of school make name stickers for your children. Using a computer and a program to make labels, personalize a sheet of stickers for each child. Make sure that they will have enough stickers on their sheets for all their classmates. Have paper labeled "My New Friends at School!" for each child.

On the first day of school when they are meeting their new friends, have them swap their stickers. Encourage them to add the stickers to their paper. This is a perfect way to start out your first day!!

Additional ideas using stickers:

Make a book for each child ahead of time.

There should be enough pages for each sticker. When the children arrive at school, they can add a sticker to each page.

Throughout the week have the children draw a picture of their new friends on their pages. They will cherish this book.
