

How Does Your Garden Grow?

Students will love to become little gardeners.

You will need:

Wagon

Seeds

Potting soil

1. Fill wagon with potting soil.
2. Have children poke holes in soil with their fingers.
3. Place seeds in the holes and cover with soil.
4. Water.

Plants need sun and water to grow. Your classroom may not receive direct sunlight. Every day at the beginning of the day pull the wagon outside so that it receives sunlight. Discuss with the children what plants need to grow. After several weeks, you will have your own little garden.
