

Reindeer Actions

Materials:

2" x 18" brown construction paper strips
Brown construction paper

Instruct students to trace around their hands and cut out. Glue the hands to the construction paper strips. Make the strip fit the students head and staple. These headbands will be a great addition to this activity.

Make cards with several different reindeer actions on them. For example, prance, jump, fly, leap, etc. Place the cards in a small sack. Have the students put on their reindeer headbands and draw one card at a time. Have the students do that action. Continue drawing a card until all cards have been read.
